

Vicen Hernandez – Vela Method

Summary

Vela is a new method to **cure with heat pulses.**

We induce a local fever-type condition to **activate the body's own tissue regeneration system.**

Cure applications include **osteoarthritis, rheumatism, wound healing, pain relief and cosmetic uses.**

Where are we today

The Vela Method has been **successfully tested.**

The **patent has been filed**, and the method has been shown at several events.

Next steps required are the **clinical validation, Vela apparatus prototyping and marketing.**

Recent activities

Book published on Vela Method
Curing Fire / Curar con Calor / Heilen mit Wärme / (2019)

World Osteoarthritis Congress (Vienna, May 2020)
Abstract accepted on curing osteoarthritis by Vela Method

MEDICA (Düsseldorf)
Visited the world's largest medical apparatuses fair to establish industry contacts for designing and production of prototype

SLUSH startup meeting (Helsinki, December 2021)
Presented Vela Method in search for seed funding

Clinical Study 2022 (anticipated with Tufts University, Boston)
